

GROM Adapters – digital car kits for integration of the Android® Smartphone and Tablet, iPod® / iPhone®, USB Drive, Bluetooth®, MP3 player into Car Stereo System Application Guide

- * Models with DSP will require **DSP Converter from GROM Audio** To determine if your car has DSP, check the guide at http://gromaudio.com/docs/bmw-dsp_application.pdf

- ** For BMW with fiber-optic stereos. BMW must have MP3 CDC capability. If there is no such capability, the stereo must be coded for CDC at the dealership or car stereo shop.

- *** **Important for 2005+ BMW X3; 2006+ BMW Z4:**
 BMW X3 (E83) production date 09/2005 and up with DSP **without** navigation, CD changer **and** iPod connection
 BMW Z4 (E85) production date 02/2006 and up with DSP **without** navigation, CD changer **and** iPod connection
 BMW Z4 (E86) coupe production date 05/2006 and up with DSP **without** navigation, CD changer **and** iPod connection

These vehicles above do not require GROM DSP adapter (use analog DSP) and can be installed at stereo or trunk, but audio part will not work until the stereo is programmed (retrofitted) to accept CD Changer (BMW calls it "vehicle order"). Please contact your local BMW dealer and ask them to retrofit the stereo to accept CD changer.

If your car falls into the above range **and has** Navigation, CD changer **or** iPod connection, **GROM will work** without any reprogramming.
